(+91) 7569434605 | [pathinavadeep420@gmail.com](mailto:pathinavadeep420@gmail.com) | [Linkedin](#)

## CAREER OBJECTIVE

Computer Science undergraduate seeking a Java Software Development Internship, where I can contribute to the development of impactful and scalable applications that solve real-world problems, while gaining hands-on industry experience and growing as a responsible and adaptable professional.

## EDUCATION

|                                                                   |                    |
|-------------------------------------------------------------------|--------------------|
| CMR Engineering College Hyderabad                                 | Sep 2023 – Present |
| Bachelor of Technology – Computer Science Engineering   CGPA:7.68 |                    |
| TMR Junior College Hyderabad                                      | 2021 – 2023        |
| Class XII   90%                                                   |                    |
| TMR School Choutuppal                                             | 2021               |
| Class X   CGPA:10.0                                               |                    |

## PROJECTS

### Pregnancy Companion- safe mom | [GitHub](#)

- Pregnancy Companion supports expectant mothers with tools like due date and trimester tracking.
- It includes features such as nutrition guides, fetal development insights, and wellness tips.
- Integrated chat support offers instant help from healthcare for pregnancy-related queries.

### Smart Farming | [GitHub](#)

- Built an AI-based crop recommendation system using ML to predict suitable crops from soil and climate data.
- Developed a Python–Flask web app for real-time, user-friendly crop prediction.
- Optimized farming decisions by reducing crop failure and improving resource efficiency through data-driven insights.
- Enabled data-driven precision agriculture by integrating machine learning models with an intuitive decision-support system for farmers.

### Mood-Based Music Recommendation System | [GitHub](#)

- Built a mood-based music recommendation system that suggests playlists using real-time mood selection and text input.
- Implemented a dynamic, emotion-aware UI with adaptive themes to enhance user immersion.
- Developed a modular front-end music player using HTML, CSS, and JavaScript with scalable playlist logic.

### Textbook Quality Assessment System using Machine Learning | [GitHub](#)

- Developed a Machine Learning–based Textbook Quality Assessment System to automate evaluation of educational content.
- Applied NLP techniques to extract features like readability, grammar, vocabulary, and topic coverage.
- Built classification models to categorize textbooks into quality levels (excellent, good, average, poor), improving efficiency and reducing subjectivity.

## SKILLS

**Programming Languages:** Java, Python, C, C++

**Web Technologies:** HTML, CSS, JavaScript

**Backend:** Java (JDBC), REST APIs, MySQL

**Data Structures:** Arrays, LinkedLists, stacks, Queues, Trees, Strings

**Platforms & Tools:** Git, GitHub, VS Code

## WORK/TRAINING EXPERIENCE

### AICTE X Microsoft AI Azure Virtual Intern

June 2025

- Gained foundational knowledge of AI and its real-world applications using Microsoft Azure.

### Deloitte Data Analytics Job Simulation — Forage

July 2025

- Analyzed and cleaned datasets using Excel and Python to generate insights through data visualization and reporting.

## CERTIFICATIONS

- Salesforce Certified Agentforce Specialist — Salesforce (Dec 2025).
- Google Cloud Career Launchpad Data Analytics track — Google Cloud (Feb 2026).
- Completed training modules in C, C++, Git, Python etc from IIT Bombay's Spoken Tutorial.
- Certified from Hexart.in in AI Foundation and AI Advanced.
